(54) Title: A MOBILE TERMINAL, AND ASSOCIATED METHODS, WITH IMPROVED USER INTERFACE

(57) Abstract: A mobile terminal having a user interface formed by a controller (400), a display (436) and a multi-way input device (438) for navigating and selecting among information shown on said display is presented. The controller is adapted, in a current context among a plurality of possible contexts, to make different logical actions available for selection by a user through respective associated physical actions on said multi-way input device (438), and to present, for a logical action available in the current context, information (490) on said display (436) that serves to indicate (492) the physical action with which the logical action is associated as well as to explain (494) the logical action.
