ABSTRACT

5 Ink guide assembly and ink tank for a dot matrix printer
head, especially a wire dot matrix printer head, comprises at
least one ink supply tank (2") containing ink absorbing means
having an ink supply port (41) which is arranged to receive
ink and transmit ink via an ink guide to printing means. The
ink absorbing means comprises at least one porous member
10 (60") whose pores are progressively reduced in size in a
direction towards the ink supply port (41) and that the ink
supply port (41) is located in a bottom wall (40a) of said ink
supply tank.
