(54) **Title:** REMOVABLE BODY PADDING

FIG. 2

(57) **Abstract:** The presently disclosed body padding (100, 200) is removably attached to a user's garment (124, 150, 624) and configured to overlie an area of the user's body susceptible to injury (e.g., the user's knees or elbows). The body padding includes a padded insert (202) and a protective cap (204), which is selectively inserted into a corresponding body pad pocket (626) within the user's garment (624). When installed, the protective cap occupies an entire window (632) into the body pad pocket and projects through the body pad window. Further, one or more attachments (214) are arranged around projecting portions (206, 212) of the protective cap, which are selectively attached to corresponding attachments arranged around the pocket window.
