(54) Title: A HANDHELD APPLIANCE

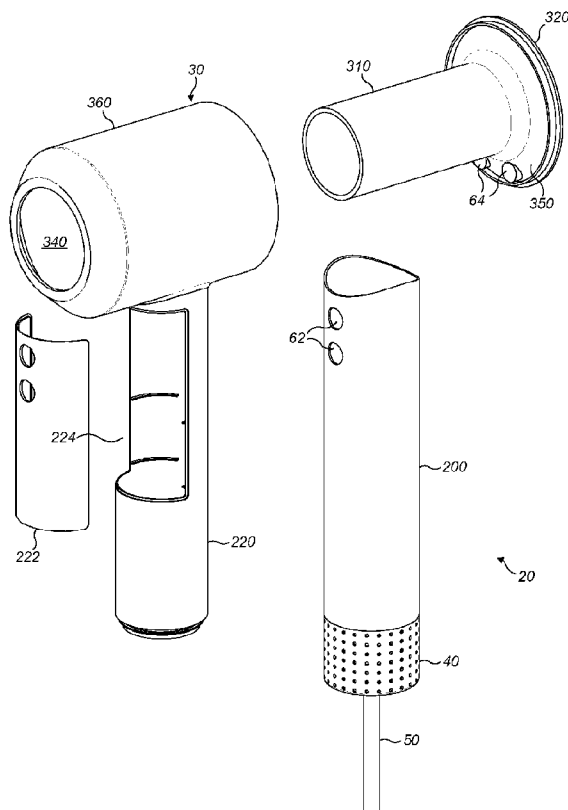

FIG. 6

(57) Abstract: Disclosed is a hair care appliance comprising a body (30) comprising an outer wall, and a handle (20) comprising an outer wall (200) and a wall (220) disposed within the outer wall wherein, the outer wall of the body (30) and the wall of the handle are formed as a single unit. The outer wall (200) may extend about the wall (220) and partially along the wall. The wall may comprise an access aperture and a hatch for closing the access aperture which the outer wall may extend over. The outer wall may extend about the wall for substantially the whole length of the wall. The handle (20) may comprise a primary fluid inlet (40) disposed at and/or near the distal end of the handle from the body which may comprise at least one aperture extending around and along the outer wall. Also disclosed is a hand held appliance.
