(54) Title: MODULAR SHELTER

FIG. 1

(57) Abstract: The modular shelter related to temporary building for keeping goods or people. The modular shelter utilizes some standardized shells for constructing walls of the modular shelter. Each of the shells can have sidewalls or ribs for strengthening the shells' curvature and strength. These standardized shells can further be stacked such that they become compact for storage and transportation. Multiple number of the modular shelter can also be joined together for providing extended shelters.
