AA First network function
BB Second network function
CC Step 21, send first request information to the second network function, wherein the first request information is used for requesting the subscription to a quality of service (QoS) monitoring result obtained by monitoring the QoS of at least two service data flows (SDFs)

(57) Abstract: Provided in the embodiments of the present disclosure is a method for subscribing to a quality of service (QoS) monitoring result. The method is executed by means of a first network function, and the method comprises: sending first request information to a second network function, wherein the first request information is used for requesting the subscription to a QoS monitoring result obtained by monitoring the QoS of at least two service data flows (SDFs). Since the first network function sends to the second network function the first request information for requesting the subscription to the QoS monitoring result, which is obtained by monitoring the QoS of the at least two SDFs, the first network function can acquire the QoS monitoring result, which is sent by the second network function with regard to the first request information. Compared with a situation whereby the QoS monitoring result cannot be obtained, collaboration between multiple SDFs can be accurately executed on the basis of the QoS monitoring result.

(AM, AZ, BY, KG, KZ, RU, TJ, TM), 欧洲 (AL, AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LT, LU, LV, MC, ME, MK, MT, NL, NO, PL, PT, RO, RS, SE, SI, SK, SM, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, KM, ML, MR, NE, SN, TD, TG)。

本国际公布：
— 包括国际检索报告(条约第21条(3))。

(57) 摘要: 本公开实施例提供了一种QoS监控结果的订阅方法, 其中, 所述方法由第一网络功能执行, 所述方法包括: 向第二网络功能发送第一请求信息; 其中, 所述第一请求信息用于请求订阅监控至少两个服务数据流SDF的服务质量QoS获得的QoS监控结果。这里, 由于第一网络功能向所述第二网络功能发送了用于请求订阅监控至少两个服务数据流SDF的服务质量QoS获得的QoS监控结果的第一请求信息, 如此, 所述第一网络功能可以获取所述第二网络功能针对所述第一请求信息发送的所述QoS监控结果, 相较于不能获得所述QoS监控结果的情况, 可以基于所述QoS监控结果准确执行多业务数据流之间的协同。
