CTG-0199, SCLC PDX model
(IV administration)

Feature	Linker-toxin (DAR)	DAR
ADC4	LBG*-MMAE	DAR 4

- Athymic Nude-Foxn1nu mice, subcu, n=8/group
- IV injection, repeat dose administration
- The graph shows the mean tumor size and SEM.
- * LBG: LCB's proprietary BG linker

Group	PR	CR
ADC4, 6mpk/Q4D*4	0/8	8/8
ADC4, 6mpk/QW*4	0/8	6/8
ADC4, 9mpk/QW*4	0/8	8/8

- PR : partial remission defined as 50~100% tumor regression
- CR : complete remission

* 14 days after IV administration, all treatment groups showed significant tumor growth inhibition or complete remission (CR)
