SERVER-SIDE ASYNCHRONOUS FORM MANAGEMENT

ABSTRACT

Methods, systems and computer program products which provide for communicating with a web browser (10) executing on a remote/mobile processing system (5) which is temporarily and intermittently connected to a second computer (6) by storing in a persistent request queue at the second computer (6), a request from the web browser to a server application accessible to the second computer (6).

Also disclosed are methods, systems and computer program products which allow for operation and management of asynchronous operations of a web browser (10) where the operations are carried out by a server-side intercept module (40).
