(54) Title: SEQUENCING ALGORITHM

(57) Abstract: The invention relates to a method for determining a sequence of at least one target template nucleic acid molecule using non-mutated sequence reads and mutated sequence reads. The invention also relates to a method for determining a sequence of at least one target template nucleic acid molecule in a sample involving controlling or normalising the number of target template nucleic acid molecules in the sample. The invention also relates to a computer programme adapted to perform the method, a computer readable medium comprising the computer programme, and computer implemented methods.
