(54) Title: POLYFLUOROPHORE NANOREPORTERS FOR FLUOROGENIC IMAGING AND EARLY DIAGNOSIS

**FIG. 1b**

(57) Abstract: Disclosed herein is a polymeric nanoreporter compound according to formula I, or a pharmaceutically acceptable salt or solvate thereof, and its uses. Also disclosed herein is a method of detecting a pathological condition in a subject, the method comprising the steps of (a) administering a polymeric nanoreporter compound according to formula I, or a pharmaceutically acceptable salt or solvate thereof, that targets the selected pathological condition to a subject; and (b) detecting any fluorescence in one or both of urine from the subject and an organ or a tissue in the subject that is targeted by the polymeric nanoreporter compound according to formula I, wherein the presence of the pathological condition in the subject is indicated by fluorescence in the urine, the tissue or organ, or both the urine and the tissue or organ.
