(54) **Title**: WEB PAGE BEHAVIOR ENHANCEMENT CONTROLS

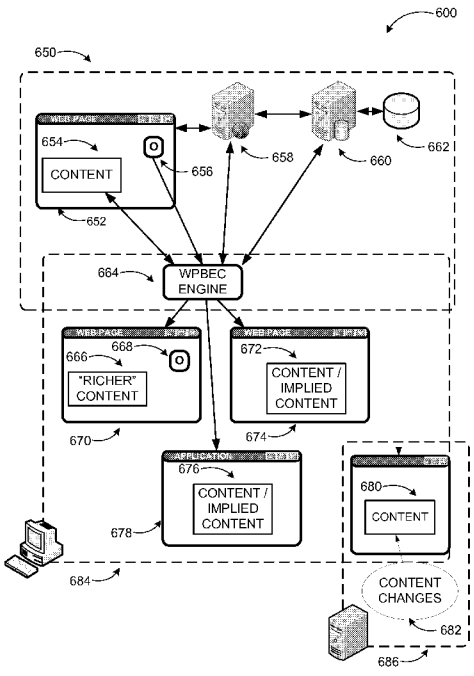

FIG. 6

(57) **Abstract**: A web page behavior enhancement (WPBE) control element is provided on a rendered web page enabling a user to perform actions on at least a portion of the web page content such as customizing, editing, sharing, analyzing, exporting, and/or annotating the content. The processed content may be presented on the original web page, on a locally stored version of the web page, or archived for subsequent use, where any changes to the original web page content may be tracked and the user notified about the changes. The WPBE control element(s) may be embedded into the web page at the source web application or at the local browser based on factors like web application capabilities, browser capabilities, user preferences, usage pattern, and comparable ones.
