(54) Title: SYSTEMS AND METHODS FOR UTILITY METER DATA COLLECTION

(57) Abstract: The invention pertains to systems and methods for utility data collection in distributed metering systems as shown in Figure 1. The system includes measurement devices located at meters (100a, 100b, 100n) which send data to a concentrator (102) which then forwards the data to a host computer (106). The data is measured as the time lapse between successive consumption of a metered product at predetermined quantity intervals.
