

ABSTRACT

USE OF MULBERRY EXTRACT IN PREPARATION OF DRUG FOR REDUCING ANIMAL WEIGHT

The present disclosure relates to use of a mulberry extract in preparation of a drug for reducing animal weight. The mulberry extract comprises: 3% to 99% of an alkaloid, 0.2% to 70% of a polysaccharide, 0% to 50% of an amino acid, 0% to 10% of flavone, and 0% to 25% of other components. The mulberry extract of the present disclosure can be used for controlling weight gain, and has a good therapeutic effect on type 2 diabetes with obesity.
