

ABSTRACT

5 Provided are an epoxy resin composition containing an epoxy resin represented by the following formula (2) and a carboxylic acid and/or a cationic polymerization catalyst, the epoxy resin having a hue by the Gardner colorimetry (in a 40% MEK solution) of not more than 2; and a curable resin composition containing an epoxy resin represented by the following formula (2) and a phenol resin and/or a polymerization catalyst.

10 (In the formula, each of plurally existent Rs independently represents a hydrogen atom, an alkyl group having from 1 to 6 carbon atoms, or an alkoxy group having from 1 to 6 carbon atoms.)
