(54) Title: SYSTEMS AND METHODS FOR ESTABLISHING CLOUD-BASED INSTANCES WITH INDEPENDENT PERMISSIONS

Figure 1

(57) Abstract: A method and system for facilitating management of cloud-based service instances, the system comprising one or more computing systems configured to communicate with at least one multi-tenant computing cloud, and configured to establish a cloud-based service instance hosted in the multi-tenant computing cloud and an access entity with permissions to access the established cloud service instance. The system can receive a request for the cloud-based service instance, the request authenticated as originating from a requestor; consult a set of access controls associated with the cloud-based service instance; determine, responsive to the consulting, if the request is allowable by the requestor; and enable, responsive to determining that the request is allowable by the requestor, the requestor to complete the request using a restricted access credential associated with the access entity.

**Declarations under Rule 4.17:**

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*
- *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*

Published:

- *with international search report (Art. 21(3))*
- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments (Rule 48.2(h))*
