

ABSTRACT

TESTING METHOD FOR DETERMINING ORAL INDICATOR

5 Provided is a testing method for determining an oral
indicator by which an oral indicator can be determined.
The testing method for determining an oral indicator
includes an image acquisition step of acquiring an
ultrasonic image of an inside of an attached gingiva of a
10 subject, using a measurement probe, an average brightness
acquisition step of acquiring average brightness of the
ultrasonic image, and an indicator determination step of
determining an oral indicator of the subject by referring
to the average brightness and a reference of an oral
15 indicator.
