(54) **Title:** METHOD AND APPARATUS FOR FIRMWARE VIRTUALIZATION

FIG. 2

(57) **Abstract:** A system and method operative to virtualize firmware of a user device that stores virtualized firmware for a user device on a remote server and receives firmware data from the user device via a network. The method parsing the firmware data, as-signing the parsed firmware data to a corresponding virtualized firmware stored on the remote server, and inserting the parsed firmware data into the corresponding virtualized firmware. The method deploying at least one remote process to access remote services offered by the remote server based on the corresponding virtualized firmware with the parsed firmware data.
