The screenshot shows a mobile application interface for configuring sleep measurement settings. The interface is divided into several sections with labels R100 through R108 and W100. At the top, there is a status bar with signal strength and battery icons. Below this, a dashed box contains the user's name and ID. The main section is titled '接続中のセンサ' (Connected Sensor) and lists the '睡眠測定装置' (Sleep Measurement Device) with its ID. Under '通信方式' (Communication Method), there are two options: '以下の装置' (Selected device) which is checked and shows 'PB-001の端末' (PB-001 terminal) in a dropdown menu, and 'ブロードキャスト許可' (Broadcast permission) which is unchecked. The '取得する情報' (Information to be acquired) section has four checkboxes: '心拍数' (Heart rate) and '呼吸数' (Respiration rate) are checked, while '睡眠日誌' (Sleep log) and '離床回数' (Leaving bed count) are unchecked. The '取得する間隔' (Acquisition interval) is set to '5分' (5 minutes). At the bottom, there are two buttons: '設定' (Settings) and '戻る' (Back).
