(54) Title: DISPLAY SYSTEM FOR USE ON HORIZONTAL OR NON-HORIZONTAL SURFACES

(57) Abstract: Embodiments of the present invention relate to display system comprising an electronic display device housed within a supporting fixture, where the supporting fixture may be capable of being arranged on a substantially horizontal surface such as a floor and walked over, or of being mounted on a non-horizontal surface, including a substantially vertical surface such as a wall. To this end, the electronic display device and supporting fixture may be thin and lightweight, while also being durable and shock resistant. Control electronics for the display device may be arranged in such a way that space is conserved.
