(54) Title: A WIRELESS COMMUNICATION METHOD AND A WIRELESS HEADSET

FIG. 1

(57) Abstract: In some embodiments, a wireless communication method is provided. The method includes communicating with a computing device, by a primary headset connected with the computing device, to obtain parameters for configuring a wireless network of transmitting and receiving audio data; configuring, by the primary headset, the wireless network; connecting and providing, by the primary headset, the parameters to one or more secondary headsets for joining the wireless network; and communicating audio data between the primary headset and the one or more secondary headsets via the wireless network.
