(54) Title: SYSTEM AND METHOD FOR SELECTION OF MESSAGING SETTINGS

(57) Abstract: A method and system of selecting messaging settings on a messaging client are provided. When an outgoing message to be sent from the messaging client is addressed to a message recipient, the messaging client accesses a data store to determine whether specific messaging settings have been stored for the message recipient. If specific messaging settings have been stored for the message recipient, the messaging client selects the specific messaging settings for the message recipient to control the message characteristics of the outgoing message.
