(54) Title: METHOD AND APPARATUS OF SIGNALING/PARSING HAPTIC DATA

(57) Abstract: There is provided methods and apparatus of signaling/parsing data representative of a mapping between a body part (1) of a body model targeted by a haptic effect and a haptic device comprising a set of haptic actuators (100 to 104, 110 to 114, 120 to 124, 130 to 134) configured to render the haptic effect on at least a part of the body part. The signaling/parsing of the data comprises writing/reading, into/from a container, first data representative of the body part and second data representative of a spatial distribution of the set of haptic actuators (100 to 104, 110 to 114, 120 to 124, 130 to 134) in a determined multidimensional space.
