FIG. 3

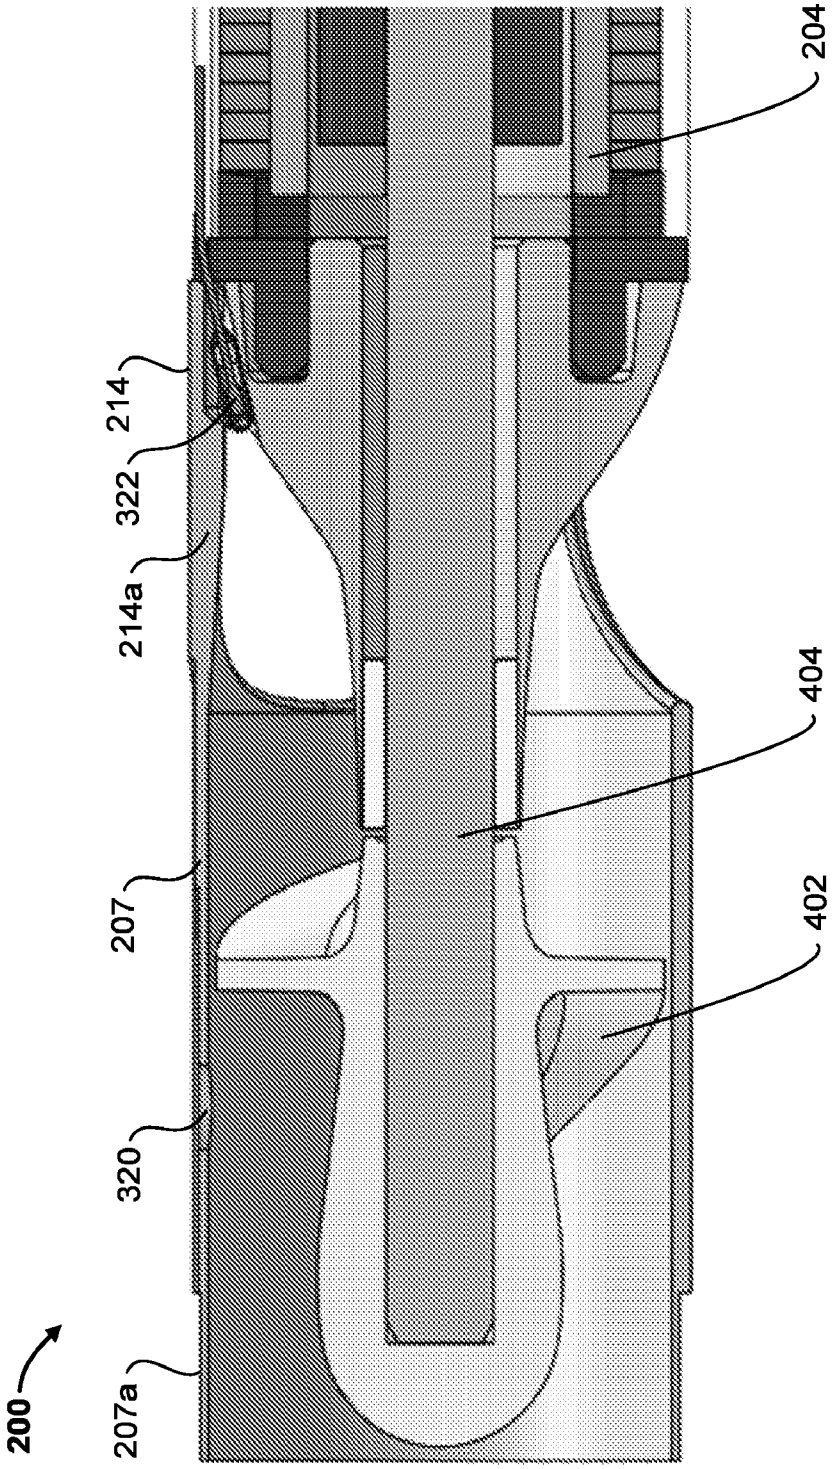

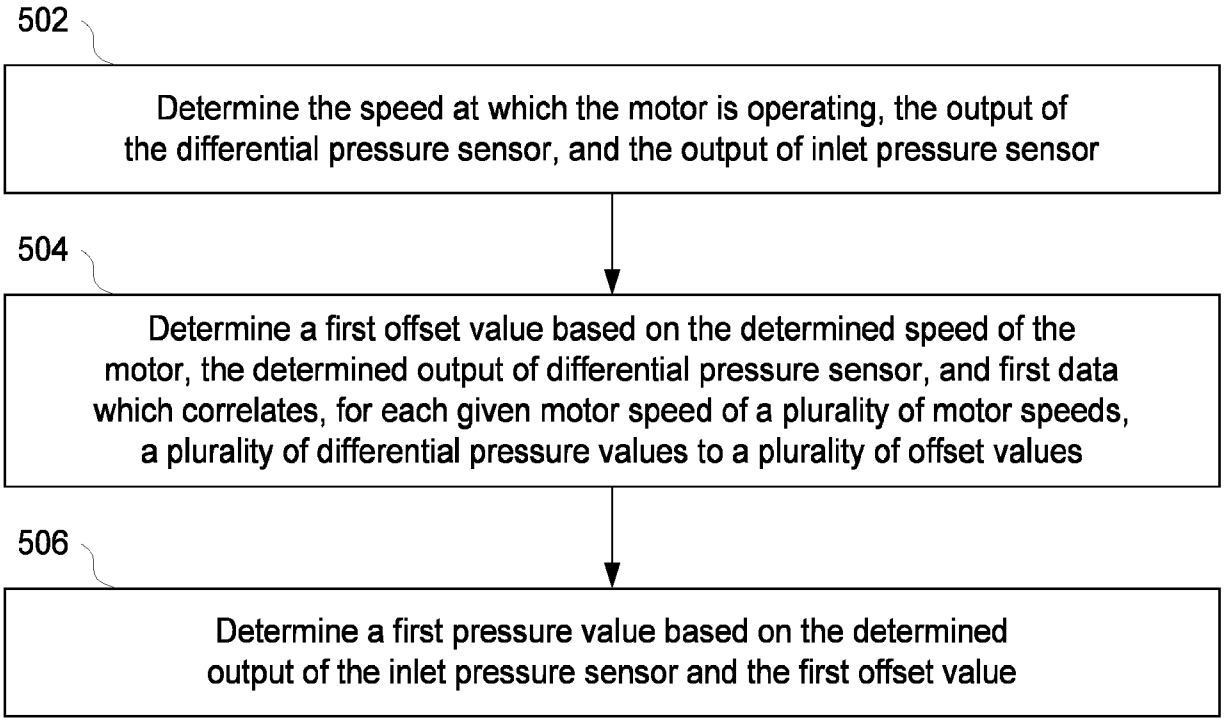

FIG. 4

502
Determine the speed at which the motor is operating, the output of the differential pressure sensor, and the output of inlet pressure sensor
504
Determine a first offset value based on the determined speed of the motor, the determined output of differential pressure sensor, and first data which correlates, for each given motor speed of a plurality of motor speeds, a plurality of differential pressure values to a plurality of offset values
506
Determine a first pressure value based on the determined output of the inlet pressure sensor and the first offset value

FIG. 8A

902
Determine the speed at which the motor is operating, the output of the differential pressure sensor, and the output of inlet pressure sensor
904
Follow steps 504 and 506 of FIG. 5 to calculate a first pressure value based on the determined output of the inlet pressure sensor and a first offset value
906
Follow steps 704 and 706 of FIG. 7 to calculate a second pressure value based on the determined output of the differential pressure sensor and a second offset value
908
Determine a third pressure value based on the first pressure value and the second pressure value

900
