AEROSOLIZABLE PREPARATION

ABSTRACT

An aerosolizable preparation which comprises a concentrate comprising the following ingredients (A) to (C) in a mixed solvent of water and a lower alcohol, and a propellant:

(A) at least one surfactant selected from the group consisting of polyoxyethylene sorbitan fatty acid esters and sorbitan fatty acid esters;

(B) 0.1 to 8% by weight of menthol, on the basis of the concentrate; and

(C) 1 to 0.5 part by weight of camphor per part by weight of the menthol, has a distinguished antipruritic effect on a fast response to itching due to e.g. insect biting and also on a slow response to itching due to e.g. athlete's foot.
