(84) Designated States (*unless otherwise indicated, for every kind of regional protection available*): ARIPO (BW, GH,

(54) Title: Q-LATCH SWIVEL BALL JOINT

FIG. 1

(57) Abstract: In general, one aspect of the subject matter described in this specification is embodied in a latch. The latch includes a ball joint. The ball joint includes a stem and a first ball positioned at a proximal end of the stem. The latch includes a casing that is configured to surround a portion of the stem and the first ball and secures the ball joint within an enclosure. The latch further includes a cap plate. The cap plate has a recess or cup that receives the first ball of the ball joint and allows the first ball to swivel within the recess or cup.
