CLAIMS

1. A composition comprising:

a polymer having a structural unit represented by at least one of formulae (1-1), (1-2) and (1-3) below; and

a curable compound

(1-1) (1-2) (1-3)

in formulae (1-1) to (1-3), R^1 is each independently a halogen atom, a monovalent hydrocarbon group having 1 to 20 carbon atoms, a monovalent halogenated hydrocarbon group having 1 to 20 carbon atoms, a nitro group, a cyano group, any of primary to tertiary amino groups or a salt of any of primary to tertiary amino groups; n is each independently an integer of 0 to 2; and when n is 2, two or more R^1 may be the same or different and may be joined together in any combination to form a part of a cyclic structure.

2. The composition according to claim 1, wherein the curable compound is at least one of an epoxy compound, a cyanate ester compound, a vinyl compound, a silicone compound, an oxazine compound, a maleimide compound and an allyl compound.

3. The composition according to claim 1 or claim 2, further comprising a curing auxiliary agent.

4. A cured product obtained by curing the composition according to any one of claims 1 to 3.

5. A laminate comprising:

a substrate; and

a cured product layer formed on the substrate by using the composition according to any one of claims 1 to 3.
