
S101
obtaining package information to be verified and a corresponding definer of the package information
S102
calculating a deviation degree of the package information according to a predetermined matching algorithm based on an operation authority and a historical definition data of the definer, the deviation degree reflects an accuracy of the package information defined by the definer
S103
if the deviation degree is greater than a preset deviation standard value, a prompt message is output to prompt the definer to verify the package information
