uncontrolled type 1 diabetes 20	
Some related terms that support post-coordination are:	
	Diabetic retinopathy
	Diabetic retinopathy associated with type 1 diabetes mellitus
	Mild nonproliferative diabetic retinopathy
	Moderate nonproliferative diabetic retinopathy
	Proliferative diabetic retinopathy
	Severe nonproliferative diabetic retinopathy
	Type 1 diabetes mellitus
	Uncontrolled type 1 diabetes circulatory disorder erectile dysfunction (E10.59) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus (E10.65)
	Uncontrolled type 1 diabetes mellitus with background retinopathy (E10.319) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with background retinopathy with macular edema (E10.311) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness (E10.39) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with cataract (E10.36) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with macular edema, with mild nonproliferative retinopathy (E10.321) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with macular edema, with moderate nonproliferative retinopathy (E10.331) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with macular edema, with proliferative retinopathy (E10.351) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with macular edema, with retinopathy (E10.311) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with macular edema, with severe nonproliferative retinopathy (E10.341) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with mild nonproliferative retinopathy (E10.329) <i>(specific)</i>
	Uncontrolled type 1 diabetes mellitus with blindness, with moderate nonproliferative retinopathy (E10.339) <i>(specific)</i>

DIABETES MELLITUS COMPLICATION STAGES	DIABETES MELLITUS COMPLICATION DETAIL	DIABETES RETINOPATHY SEVERITY
- without complication - with circulatory complication - with diabetic arthropathy - with hyperglycemia - with hyperosmolality - with hypoglycemia - with ketacidosis - with kidney complications - with neurologic complications - with ophthalmic complications - with oral complications - with skin complications - with other specified complication - with unspecified complications	- with diabetic retinopathy - with cataract - with diabetic macular edema, resolved following treatment - with other ophthalmic complication - with chronic kidney disease - with macroalbuminuria - with nephropathy - with other kidney complication - with amyotrophy - with subcutaneous neuropathy - with mononeuropathy - with polyneuropathy - with other neurological complication - with unspecified neuropathy - with coma - without coma - with peripheral angiopathy with gangrene - with peripheral angiopathy without gangrene - with other circulatory complications - with neuroendocrine autopathy - with other arthropathy - with dermatitis - with foot ulcer - with other skin ulcer - with other skin complication - with periodontal disease - with other oral complications	- with mild nonproliferative retinopathy - with moderate nonproliferative retinopathy - with severe nonproliferative retinopathy - with proliferative retinopathy - with unspecified retinopathy, severe
		PROLIFERATIVE RETINOPATHY STAGE
		- stable - with traction retinal detachment involving macula - with traction retinal detachment not involving macula - with combined traction retinal detachment and rhegmatogenous retinal detachment - unspecified
		DIABETES MELLITUS MACULAR EDEMA
		- with macular edema - without macular edema - macular edema presence unspecified
		LATENCY
		- right - left - bilateral - unspecified laterality
		CHRONIC KIDNEY DISEASE STAGE
		- stage 1 - stage 2 (mild) - stage 3 (moderate) - stage 4 (severe) - stage 5, not on chronic dialysis - on chronic dialysis - unspecified stage

Implementation options		Hosting options	RDBMS Release	IMO Terminology Portal	
			Data resident in application database	IMO-hosted	Institution-hosted
					IMO 2.0
Vendor-supplied UI	Raw Data access		✓		
	TCP/IP or "direct connect" Currently the most widely-used option by vendors to implement IMO Interface Terminologies within applications.			✓	✓
	IMO Terminology Portal Web Services (REST & SOAP) IMO supports various web services that may simplify communication to the IMO Terminology Portal.			✓	✓
IMO-supplied UI	IMO Widgets IMO provide themeable widgets that interface with IMO Interface Terminology Products for simple replacement of existing UI elements with little to no impact to existing behavior.			✓	✓
	PLUG IT In & IMO-Advanced Search IMO may provide a web-based UI to leverage within an application using an iFrame or embedded web browser with supporting APIs, allowing for information to be sent to and from the web application.			✓	✓
