<Sequence Listing>

<110> DiNonA Inc.
SNU R&DB FOUNDATION

<120> AN ANTIBODY INDUCING ANTIGEN-SPECIFIC T CELL TOLERANCE AND USE THEREOF

<160> 10

<170> KopatentIn 1.71

<210> 1
<211> 30
<212> DNA
<213> Artificial Sequence

<220>
<223> 5' primer for amplifying the extracellular domains of human ICAM-1

<400> 1
gctagcgcaa cctcagcctc gctatggctc 30

<210> 2
<211> 29
<212> DNA
<213> Artificial Sequence

<220>
<223> 3' primer for amplifying the extracellular domains of human ICAM-1

<400> 2
gaattcatct cataccgggg ggagagcac 29

<210> 3
<211> 35
<212> DNA
<213> Artificial Sequence

<220>
<223> 5' primer for amplifying human ICAM-1 domain 1 (h1)

<400> 3
gaattcatgg ctcccagcag cccccggccc gcgct 35

<210> 4
<211> 46
<212> DNA
<213> Artificial Sequence

<220>
<223> 3' primer for amplifying human ICAM-1 domain 1 (h1)

<400> 4
aggtctcagc tccacccgtt ctggagtcca gtacacggtg aggaag 46

<210> 5
<211> 46
<212> DNA
<213> Artificial Sequence

<220>

<223> 5' primer for amplifying murine ICAM-1 domains 2-5, a transmembrane domain and a cytoplasmic domain (m2345)

<400> 5
ctggactcca gaacgggtgg agctgagacc tctgccagcc tggcag 46

<210> 6
<211> 39
<212> DNA
<213> Artificial Sequence

<220>
<223> 3' primer for amplifying murine ICAM-1 domains 2-5, a transmembrane domain and a cytoplasmic domain (m2345)

<400> 6
ggatccggga ggtggggctt gtcccttgag ttttatggc 39

<210> 7
<211> 35
<212> DNA
<213> Artificial Sequence

<220>
<223> 5' primer for amplifying human ICAM-1 domains 1-2 (h12)

<400> 7
gaattcatgg ctcccagcag cccccggccc gcgct 35

<210> 8

<211> 45
<212> DNA
<213> Artificial Sequence

<220>
<223> 3' primer for amplifying human ICAM-1 domains 1-2 (h12)

<400> 8
ggtagctgga agatcaaagg tctggagctg gtagggggcc gaggt 45

<210> 9
<211> 48
<212> DNA
<213> Artificial Sequence

<220>
<223> 5' primer for amplifying murine ICAM-1 domains 3-5 (m345)

<400> 9
cagctccaga cctttgatct tccagctacc atcccaaagc tcgacacc 48

<210> 10
<211> 39
<212> DNA
<213> Artificial Sequence

<220>
<223> 3' primer for amplifying murine ICAM-1 domains 3-5 (m345)

<400> 10
