(54) Title: SYSTEMS, METHODS AND COMPUTER PROGRAM PRODUCTS FOR DETERMINING INFORMATION FROM
IMAGE-BASED DOCUMENTS

Fig. 1

(57) Abstract: Some embodiments are directed to a method comprising: receiving extracted information comprising information ex-
tracted from a digital document, the digital document encoding a plurality of data items, each data item of the plurality of data items
being associated with a data category of a plurality of data categories; selecting a first data category of the plurality of data categories;
determining a plurality of potential configurations associated with the first data category of the plurality of data categories; determining
based on the extracted information, whether a data item associated with the first data category is identifiable at the first potential con-
figuration; and in response to a data item associated with the first data category not being positioned at a first potential configuration,
determining, based on the extracted information, whether a data item associated with the first data category is identifiable at a second
potential configuration.
