(54) Title: BISPECIFIC BINDING MOLECULE

Figure 1

(57) Abstract: A bispecific binding molecule is provided, which comprises two identical antibody heavy chains and a single chain component which is a polypeptide chain comprising two identical antibody light chains linked to a single chain binding module with affinity for a target which mediates transport of the bispecific binding molecule across the blood-brain barrier (BBB). Also provided are therapeutic, prophylactic, prognostic and diagnostic uses of the bispecific binding molecule.
