(54) Title: TREATMENT OF HAEMATOLOGICAL CANCER

(57) Abstract: The present disclosure relates to a method of treating haematological cancers (including resistant forms thereof). Also provided are methods of treating aberrantly activated (or reactive) stroma, for example cancer stroma associated with haematological cancers, to change the status thereof, for example to render it/them less permissive to cancer cells and/or to reduce stroma generated resistance to treatment, using an antibody or antigen binding fragment thereof that is an inhibitor of the FBG region of tenascin C.
