(54) Title: MODIFIED APOLIPOPROTEINS WITH A TARGETING BODY FOR LIPID NANOPARTICLES

Fig. 1

(57) Abstract: The invention relates to modified apolipoprotein with a targeting body. The targeting body may for example be an antibody or antigen binding fragment that allows targeting of e.g. a specific cell, tissue or organ. The modified apolipoprotein can be used as a carrier for a payload as such or when incorporated in a lipid nanoparticle. The modified apolipoprotein finds use in the treatment or prevention of diseases, or targeting a payload to a specific target site.
