What is claimed is:

1. A water-soluble film product comprising: (i) apixaban or a pharmaceutically acceptable salt thereof; and (ii) a water-soluble polymer comprising a hydrophilic cellulosic polymer wherein the water-soluble polymer comprises at least 10% hydrophilic cellulosic polymer:

(i) less than 77 wt % of apixaban or a pharmaceutically acceptable salt thereof dissolves within 30 minutes in a pH 6.8 phosphate buffer containing 0.05% sodium lauryl sulfate,

(ii) the film comprises less than 10% of water content, and

(iii) the disintegration time of the film is less than 5 minutes.

2. The water-soluble film of claim 1 wherein the apixaban is crystalline.

3.The water-soluble film of any one of the preceding claims wherein less than 77% of apixaban dissolves within 30 minutes in a pH 6.8 phosphate buffer containing 0.05% sodium lauryl sulfate.

4. The water-soluble film of any one of the preceding claims comprising 8-12% wt/wt% of apixaban.

5. The water-soluble film of any one of the preceding claims comprising 10% wt/wt% of apixaban.

6. The water-soluble film of any one of the preceding claims, wherein said film has a thickness of 2 mils to 9 mils.

7. The water-soluble film of any one of the preceding claims, further comprising an additional pharmaceutical active ingredient.

8. The water-soluble film of any one of the preceding claims, further comprising one or more sweeteners.

9. The water-soluble film of any one of the preceding claims, further comprising one or more flavors.

10. The water-soluble film of any one of the preceding claims, further comprising an anticoagulant.

11. Use of the film product of any one of the preceding claims in the manufacture of a medicament for treating thrombosis or a related disorder in a human subject in need thereof.

12. The use of claim 11 wherein about 0.5 mg to about 20 mg of apixaban is to be delivered from the film product to the human subject.
