(54) Title: KIT FOR THE INSTALLATION OF PROSTHETIC COMPONENTS AND/OR BIOMEDICAL IMPLANTS

Fig. 10

(57) Abstract: The present invention relates to a kit for installation of prosthetic components and/or biomedical implants comprising a prosthetic component having an intraosseous taproot, formed of one piece with the prosthesis, for attachment of said prosthetic component to the bone of a patient. Said prosthetic component and said taproot are advantageously made of biocompatible metal material, namely titanium or alloys thereof, and said taproot has at least one portion with a triangular cross-section, as viewed in a horizontal cross-sectional plane. The kit of the present invention further comprises at least one first guiding component for a guide wire, for guiding the insertion of a guide wire (K) into the bone, and at least one second guiding component for an impactor having a triangular section.
