

ABSTRACT

A wiping sheet 1 includes a fiber aggregate 1A containing synthetic fibers 2 and impregnated with a cleaning fluid 5. The fiber aggregate 1A has a dry basis weight of 50 g/m² to 100 g/m². The cleaning fluid 5 contains two nonionic surfactants having different HLB values. One of the nonionic surfactants has an HLB value of from 12 to less than 15, and the other from 15 to 18. The content of the cleaning fluid 5 in the wiping sheet 1 is 205 g/m² to 380 g/m².
