(54) **Title:** MEDICAL DEVICE SYSTEM, AND DISPOSABLE CONTAINER

Fig. 1

(57) **Abstract:** The present invention relates to a medical device system comprising a body-wearable medical device, and a disposable container comprising a reservoir volume configured for storing a foodstuff or a drug and a tamper evident closure which seals an opening in the disposable container, wherein the opening provides access to the reservoir volume. To reduce the burden of the patient to compose the packages to be carried along by a patient when leaving home, the disposable container comprises a body-wearable medical device fastener configured for detachable fastening the disposable container to the body-wearable medical device and/or the body-wearable medical device comprises a disposable container fastener configured for detachable fastening the body-wearable medical device to the disposable container.
