DATA PROCESSING METHOD AND SYSTEM

说 明 书 摘 要

本说明书提供一种数据处理方法及系统，获取待处理流程图中箭头的箭头数据；获取所述待处理流程图中字符的字符数据；以及基于所述箭头数据和所述字符数据，生成所述待处理流程图对应的第一结构化数据，所述第一结构化数据包括所述字符之间的连接关系。本说明书提供的数据处理方法可以应用于需要对流程图进行结构化数据提取的场景中，以实现对流程图中的字符之间的连接关系的提取，生成具有字符之间连接关系的第一结构化数据。

This specification provides a data processing method and system, to obtain arrow data of an arrow in a to-be-processed flowchart; obtain character data of characters in the to-be-processed flowchart; and generate first structured data corresponding to the to-be-processed flowchart based on the arrow data and the character data. The first structured data includes a connection relationship between the characters. The data processing method provided in this specification can be applied to a scenario in which structured data extraction needs to be performed on a flowchart, to implement extraction of a connection relationship between characters in the flowchart, and generation of first structured data that has the connection relationship between characters.
