

TITLE:

METHOD AND SYSTEM FOR CONTROLLING USAGE PERMISSION OF TRAINING
DATA

5

ABSTRACT

A method and system for controlling a usage permission of training data are provided. The method includes: obtaining source verification information corresponding to first training data; confirming a source of the first training data based on the source verification information; 10 enabling a usage permission corresponding to the first training data if the source of the first training data meets a predetermined condition and training a computing model based on the first training data; and disabling the usage permission corresponding to the first training data if the source of the first training data does not meet the predetermined condition.
