

## **FABRIC FOREIGN MATERIAL EXCLUSION SYSTEM**

### **ABSTRACT**

The present application provides a foreign material exclusion system (100) for positioning within a casing (64) of a turbine (40) to catch any foreign material (82) during maintenance of the turbine (40). The foreign material exclusion system (100) may include a fabric sleeve (110) with a semicircular shape (120) and a number of poles (190) attached to the sleeve (110) to maintain the sleeve (110) in place within the turbine casing (64).
