(54) Title: VEHICLE BARRIER/ADVERTISEMENT SYSTEM

(57) Abstract: A vehicle barrier/advertisement system (10) includes a vehicle parking barrier (14) having a front face (16), a rear face (18), an upper surface therebetween and a pair of end surfaces. The barrier (14) has a generally horizontal lower surface positionable on a parking surface. A coupling (30) is used to secure the parking barrier (14) to the parking surface. A barrier cover (32) has a front face (34), a rear face (36) and an upper surface therebetween. The cover (32) has a generally horizontal lower opening with lower edges positionable adjacent to the parking surface, and the cover (32) is sized and shaped to be securely positioned over the vehicle parking barrier (14). An advertisement sheet (58) has an interior surface positioned with respect to one face of the cover (32), the sheet (58) also having an exterior surface with advertising indicia thereon. An additional coupling (48) is used to secure the cover (32) to the barrier (14).
