- of inventorship (Rule 4.17(iv))

(54) Title: NONAUTOLOGOUS MULTI-STRESSED CANCER CELLS AND USES THEREOF FOR VACCINATING AND TREATING CANCERS

(57) Abstract: The present invention relates to the field of advanced therapy medicinal products (AMTPs) for cell therapy. In particular, it relates to a composition comprising stressed HT-29, HCT-116 and LoVo cells, and immunogenic stress proteins produced by these cells in response to stresses applied *in vitro*. The composition allows to simultaneously counteract multiple cell resistance mechanisms observed *in situ* in cancer cells, and is therefore suitable for vaccinating and treating cancers in human patients.
