

ABSTRACT**A reinforced front part for use in the manufacture of cabins/bodies for vehicles**

5 A reinforced front part (1) of plastic for use in the manufacture of cabins/bodies for vehicles is, in order to achieve sufficient body rigidity, moulded or shaped as a "box-shaped" unit in one piece, with closed walls on five sides, which in the vehicle will form the front, bottom, bonnet and two sides with shapes for mudguards (12) and with an opening or cavity on the side (2) which faces the interior of the vehicle.
