(54) Title: VEHICLE STORAGE SYSTEM

FIG. 1

(57) Abstract: A vehicle storage system may include a deck configured to span substantially a total width of a vehicle bed, four support feet including two front support feet and two rear support feet, a center support extending in a longitudinal direction of the vehicle bed between the support feet and configured to support the deck, and a drawer assembly. The deck may include raised portions for coupling to an underside of an accessory case, and tie down attachment points that anchor materials to the deck, while transferring load and connecting the storage system to the truck bed. The drawer assembly may extend outward from the deck to allow full opening of the accessory case without removal of the accessory case from the drawer assembly.
