(54) Title: RANDOM ACCESS POINT ACCESS UNIT IN SCALABLE VIDEO CODING

600
↓

Performing a conversion between a video
comprising one or more pictures in one or
more video layers and a bitstream of a
video, the bitstream comprising a coded
video sequence that includes one or
more access units, and the bitstream
further comprising a first syntax element
indicating whether an access unit
includes a picture for each video layer
making up the coded video sequence

610

(57) Abstract: Methods, devices and systems for configuring different access units in scalable video coding are described. In one example aspect, a method of video processing include performing a conversion between a video comprising one or more pictures in one or more video layers and a bitstream of a video, wherein the bitstream comprises a coded video sequence that includes one or more access units, and wherein the bitstream further comprises a first syntax element indicating whether an access unit includes a picture for each video layer making up the coded video sequence.
