(54) Title: A TAMPER PROOF LUER LOCK CONNECTOR AND A VALVE ARRANGEMENT FOR AN ADAPTOR

FIG. 1A

(57) Abstract: A connector for connection with a fluid transfer device, said connector comprising: an outer body having a longitudinal axis; and a luer lock connection port positioned within the outer body and configured to be coupled with an external port of said fluid transfer device, the luer lock connection port being rotatable about the longitudinal axis at least in one of a clockwise direction and a counter-clockwise direction at least prior to initiation of coupling thereof with the external port; wherein the outer body is structured, and the luer lock connection port is positioned therewithin, such that to prevent an operator to access, through the outer body, directly by fingertips an exterior of the luer lock connection port after the luer lock connection port has been coupled with the external port.
