

ABSTRACT

Provided are a navigation method and apparatus, an electronic device, and a storage medium. The navigation method includes: acquiring a current positioning location and a navigation destination of a target vehicle as well as a navigation line associated with lanes on a road from the current positioning location to the navigation destination, the navigation line being generated in advance; generating a target navigation line of the target vehicle from the current positioning location to the navigation destination based on the navigation line, the target navigation line being formed by splicing the navigation line of at least one lane; and controlling the target vehicle to travel according to the target navigation line.
