(84) Designated States (unless otherwise indicated, for every kind of regional protection available): ARIPO (BW, GH,

(54) Title: PULSATING TIME VARYING FREQUENCY ELECTROMAGNETIC WAVE COMPONENTS FOR TASTE ENHANCEMENT OF FOODS AND BEVERAGES

FIGURE 1

(57) Abstract: A pulsating time varying frequency electromagnetic wave components for enhancement of taste of foods and beverages comprising a power supply unit, a printed circuit board connected to said power supply unit and conductor probe units connected to said printed circuit board wherein said conductor probe units are taken from a group consisting of straight rods, plates, meshes and coils; said power supply unit is taken from a group consisting of pulsed switching power supply, wet battery, dry battery and transformer rectifier, and said printed circuit board is adapted to produce low, medium and high frequency range time varying wave.
