

Abstract of the Disclosure

A system for creating a customized drug library
5 for an electronically loadable drug infusion pump, the
system including a drug library containing a plurality of
drug entries, there being associated with each drug entry
a set of associated drug delivery parameters and/or drug
delivery protocols for configuring the drug infusion
10 pump; a tool for selecting a set of drug entries from
among the plurality of drug entries in said drug library;
a tool for adding the selected drug entries along with
the sets of drug delivery information associated
therewith to a customized library; and a loading tool for
15 causing the system to electronically load the customized
library into the drug infusion pump.
