

ABSTRACT

5 Embodiments of the present invention provide an information transmission
method and apparatus. The method comprises: a first device obtains first indication
information sent by a second device, the first indication information being used for
indicating first system information required by the second device; and the first device
10 sends the first system information according to the first indication information. By
means of the embodiments of the present application, the sending efficiency can be
improved, signaling overheads can be reduced, and a resource waste can be avoided.
